

MEDICAL EDUCATION SCIENTISTS AMSTERDAM

REALIST APPROACH IN HEALTH PROFESSIONS EDUCATION RESEARCH

METHODOLOGY WORKSHOP WITH SPINOZA PROFESSOR DR. KAREN MATTICK

Curious how we can move beyond “what works” to explore “what works, for whom, in what circumstances, and why”?

In this session, Dr. Karen Mattick will provide an introduction to realist research methods, signposting key resources and examples from her work in the field of health professions education and wellbeing. She will start by outlining the principles underpinning all realist research, before talking about specific realist review and realist evaluation research projects, and inviting participants to consider whether these approaches might be helpful for their own research.

WORKSHOP DETAILS

30 SEPTEMBER 2025. 13:00 – 15:30

AT ROOM J2-228, AMSTERDAM UMC, MEIBERGDREEF 9

This session is free to attend. Just fill out the form to let us know you're coming!
