

Amsterdam institute for Infection and Immunity
Seminar serie 2022

Tuesdays from 16:00 - 17:00 hrs

Please join us online on March 22 from 16.00-17.00 hrs

Young investigator in the spotlight - short talk:

Maarten Steinz

**Macrophage polarization markers for PET imaging
in rheumatoid arthritis**

Keynote speaker

Stefano Alivernini

**Synovial tissue macrophages heterogeneity across
disease phases of Rheumatoid Arthritis**

Stefano Alivernini, MD, PhD, is Consultant Rheumatologist and Academic Researcher at the Fondazione Policlinico Universitario A. Gemelli IRCCS in Rome, Italy, where he is in charge of the Synovial Tissue Biopsy Unit (SYNGem) at the Division of Rheumatology, which is actively involved in translational studies and tissue-driven clinical trials.

His research activity is focused on rheumatoid arthritis and psoriatic rthritis with specific interest in synovitis, mechanisms leading to tissue inflammation and its resolution, and on biomarker discovery for personalized treatment of inflammatory arthritis. He has published several seminal papers on this topic in high-ranking journals including Nature Medicine, Science Advances and the Annals of the Rheumatic Diseases.
