Hybride meeting with live streaming followed by drinks

Cornelis J.M. Melief

Emeritus professor of immunology, Leiden University Medical Center (LUMC)
and CSO of Biotech Co. ISA Pharmaceuticals, Leiden

**"Combination immunotherapy of cancers caused by high risk
human papilloma virus"**

Kees Melief is the founding father of Cancer Immunology in the Netherlands. Already in 1985, he established the tumor immunology group at LUMC, and successfully integrated basic immunology and cancer research. Professor Melief and his research team achieved many ground-breaking and award-winning discoveries on the question how to mobilize the immune system to effectively fight cancer.
