

Amsterdam institute for Infection and Immunity
Seminar serie 2022

Tuesdays from 16:00 - 17:00 hrs

Please join us online on the 1st of Februari from 16.00-17.00 hrs

Young investigator in the spotlight - short talk:

Tiago Matos

The key role of resident memory T cells for the immune system

Keynote speaker:

Georg Stary

Delayed antiretroviral therapy in HIV-infected individuals leads to irreversible depletion of skin and mucosa-resident memory T cells

Georg Stary is dermatologist and PI working at the Vienna Medical University. His research projects are focusing on different aspects of host-pathogen interactions and the contribution of tissue-resident leukocytes to physiologic and pathologic immune responses.
