Thursda	Thursday June 3rd 2021				
10:00	10:05	Introduction		Livestream from Eenhoorn Meeting Center Amersfoort	
10:05	10:50	Invited speaker: Dr. Joep Beumer		Livestream from Eenhoorn Meeting Center Amersfoort	
10:50	11:15	AGEM grants 2021 award ceremony		Livestream from Eenhoorn Meeting Center Amersfoort	
11:15	11:45	AGEM best publication 2020 battle		Livestream from Eenhoorn Meeting Center Amersfoort	
11:45	12:00	AGEM duo-presentation		Livestream from Eenhoorn Meeting Center Amersfoort	
		Remco Kersten and David Trampert	Duo-presentation	The biliary bicarbonate umbrella screening: A high-throughput approach to identify novel therapeutic targets for cholestatic liver diseases	
12:00	13:20	Lunch break			
13:20	14:30	AGEM presentations in 5 parallel sessions			
13:20	14:30	Session A1: Chaired by Elsa van Liere	e & Tom van den Bosch	ZOOM: Breakout Room 1	
A1	1	Ruben de Boer	Classical presentation	Grp78 facilitates Kras dependent Glut1 expression in Apc Kras mutated intestinal crypts, critical for adenoma progression	
A1	2	Sanne Bootsma	Classical presentation	Effective treatment of colorectal peritoneal metastases by exploiting a molecular subtype specific vulnerability	
A1	3	Benthe Dijkman	Classical presentation	Benign breast biopsies in transgender men	
A1	4	Liselotte Zwager	Classical elevator pitch	Deep submucosal invasion as independent risk factor for lymph node metastasis in T1 colorectal cancer: a meta-analysis	
A1	5	Sanne van Neerven	Classical elevator pitch	Apc-mutant cells act as supercompetitors in intestinal tumour initiation	
A1	6	Milou van Driel	Classical elevator pitch	Towards developing Novel Chemoprevention Strategies for Lynch Syndrome-associated Colorectal Cancer	
A1	7	Paula Metselaar	Classical elevator pitch	Molecular mechanisms of fatigue in inflammatory bowel diseases	
A1	8	Tom van den Bosch	Classical elevator pitch	Chromosomal copy number heterogeneity predicts survival rates across cancers	
A1	9	Jelmer Jukema	Classical elevator pitch	Integrated frame informativeness assessment algorithm for Barrett's neoplasia	
A1	10	Irini Kreulen	Classical elevator pitch	Hypoxia induced epithelial responses in early intestinal disease	
13:20	14:30	Session A2: Chaired by Ishtu Hagema	an & Tessa Diekcman	ZOOM: Breakout Room 2	
A2	1	Ahmed Elfiky	Classical presentation	Mononuclear myeloid cell targeted histone deacetylase (HDAC) inhibitor impairs colon monocytes differentiation in vivo and ameliorates colitis in preclinical murine model of IBD	
		,	•		
A2	2	Tessa Dieckman	Classical presentation	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II	
A2 A2	2	•	•		
	_	Tessa Dieckman	Classical presentation	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II	
A2	3	Tessa Dieckman Anne ten Hove	Classical presentation Classical presentation	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation	
A2 A2	3	Tessa Dieckman Anne ten Hove Charlotte Verburgt	Classical presentation Classical presentation Classical elevator pitch	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool	
A2 A2 A2	3 4 5	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers	Classical presentation Classical presentation Classical elevator pitch Classical elevator pitch Classical elevator pitch Classical elevator pitch	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health	
A2 A2 A2 A2	3 4 5 6	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg	Classical presentation Classical presentation Classical elevator pitch Classical elevator pitch Classical elevator pitch	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health Editing DNA methylation of SP140 gene using CRISPR deficient-Cas9 approach for studying differential DNA methylome profile in CD patients	
A2 A2 A2 A2 A2	3 4 5 6 7	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg Ulrika Boulund	Classical presentation Classical presentation Classical elevator pitch Classical elevator pitch Classical elevator pitch Classical elevator pitch	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health	
A2 A2 A2 A2 A2 A2	3 4 5 6 7 8	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg Ulrika Boulund Ishtu Hageman Femke Crouwel Kiki Fockens	Classical presentation Classical presentation Classical elevator pitch	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health Editing DNA methylation of SP140 gene using CRISPR deficient-Cas9 approach for studying differential DNA methylome profile in CD patients	
A2 A2 A2 A2 A2 A2 A2	3 4 5 6 7 8 9	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg Ulrika Boulund Ishtu Hageman Femke Crouwel Kiki Fockens Session A3: Chaired by Sebastian He	Classical presentation Classical presentation Classical elevator pitch	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health Editing DNA methylation of SP140 gene using CRISPR deficient-Cas9 approach for studying differential DNA methylome profile in CD patients Microbial metabolism of thiopurines Linked color imaging improves identification of early gastric cancer for both expert and non-expert endoscopists ZOOM: Breakout Room 3	
A2 A2 A2 A2 A2 A2 A2 A2	3 4 5 6 7 8 9	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg Ulrika Boulund Ishtu Hageman Femke Crouwel Kiki Fockens Session A3: Chaired by Sebastian He	Classical presentation Classical presentation Classical elevator pitch Classical presentation	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health Editing DNA methylation of SP140 gene using CRISPR deficient-Cas9 approach for studying differential DNA methylome profile in CD patients Microbial metabolism of thiopurines Linked color imaging improves identification of early gastric cancer for both expert and non-expert endoscopists **TOOM: Breakout Room 3** SPRING is a novel determinant in SREBP signalling and cholesterol metabolism	
A2 A2 A2 A2 A2 A2 A2 A2 A2	3 4 5 6 7 8 9	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg Ulrika Boulund Ishtu Hageman Femke Crouwel Kiki Fockens Session A3: Chaired by Sebastian He Sebastian Hendrix Roni F. Kunst	Classical presentation Classical presentation Classical elevator pitch Classical presentation Classical presentation	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health Editing DNA methylation of SP140 gene using CRISPR deficient-Cas9 approach for studying differential DNA methylome profile in CD patients Microbial metabolism of thiopurines Linked color imaging improves identification of early gastric cancer for both expert and non-expert endoscopists ZOOM: Breakout Room 3 SPRING is a novel determinant in SREBP signalling and cholesterol metabolism A reduced bile salt pool size and increased renal excretion protect ASBT-deficient mice against liver damage upon bile duct ligation	
A2 A2 A2 A2 A2 A2 A2 A2 A2 A3 A3 A3	3 4 5 6 7 8 9 10 14:30	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg Ulrika Boulund Ishtu Hageman Femke Crouwel Kiki Fockens Session A3: Chaired by Sebastian He Sebastian Hendrix Roni F. Kunst Francesca Paola Giugliano	Classical presentation Classical presentation Classical elevator pitch Classical presentation Classical presentation Classical presentation	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health Editing DNA methylation of SP140 gene using CRISPR deficient-Cas9 approach for studying differential DNA methylome profile in CD patients Microbial metabolism of thiopurines Linked color imaging improves identification of early gastric cancer for both expert and non-expert endoscopists ZOOM: Breakout Room 3 SPRING is a novel determinant in SREBP signalling and cholesterol metabolism A reduced bile salt pool size and increased renal excretion protect ASBT-deficient mice against liver damage upon bile duct ligation Potential role of interferon gamma in modulating human intestinal epithelial barrier maturation	
A2 A2 A2 A2 A2 A2 A2 A2 A2 A3 A3	3 4 5 6 7 8 9 10 14:30 1	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg Ulrika Boulund Ishtu Hageman Femke Crouwel Kiki Fockens Session A3: Chaired by Sebastian He Sebastian Hendrix Roni F. Kunst Francesca Paola Giugliano Jayron Habibe	Classical presentation Classical presentation Classical elevator pitch Classical presentation Classical presentation Classical presentation Classical presentation	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health Editing DNA methylation of SP140 gene using CRISPR deficient-Cas9 approach for studying differential DNA methylome profile in CD patients Microbial metabolism of thiopurines Linked color imaging improves identification of early gastric cancer for both expert and non-expert endoscopists ZOOM: Breakout Room 3 SPRING is a novel determinant in SREBP signalling and cholesterol metabolism A reduced bile salt pool size and increased renal excretion protect ASBT-deficient mice against liver damage upon bile duct ligation Potential role of interferon gamma in modulating human intestinal epithelial barrier maturation The protective role of FHL2-deficiency in glucose metabolism	
A2 A2 A2 A2 A2 A2 A2 A2 A2 A3 A3 A3	3 4 5 6 7 8 9 10 14:30 1	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg Ulrika Boulund Ishtu Hageman Femke Crouwel Kiki Fockens Session A3: Chaired by Sebastian He Sebastian Hendrix Roni F. Kunst Francesca Paola Giugliano Jayron Habibe Laura Tseng	Classical presentation Classical presentation Classical elevator pitch Classical presentation Classical presentation Classical presentation Classical presentation Classical presentation Classical presentation Classical elevator pitch	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using AI to improve long-term health Editing DNA methylation of SP140 gene using CRISPR deficient-Cas9 approach for studying differential DNA methylome profile in CD patients Microbial metabolism of thiopurines Linked color imaging improves identification of early gastric cancer for both expert and non-expert endoscopists **TOOM: Breakout Room 3** SPRING is a novel determinant in SREBP signalling and cholesterol metabolism A reduced bile salt pool size and increased renal excretion protect ASBT-deficient mice against liver damage upon bile duct ligation Potential role of interferon gamma in modulating human intestinal epithelial barrier maturation The protective role of FHL2-deficiency in glucose metabolism Timing of therapy and neurodevelopmental outcome in 18 families with PDE-ALDH7A1	
A2 A2 A2 A2 A2 A2 A2 A2 A2 A3 A3 A3	3 4 5 6 7 8 9 10 14:30 1 2 3 4	Tessa Dieckman Anne ten Hove Charlotte Verburgt Manon Balvers Maartje van de Meeberg Ulrika Boulund Ishtu Hageman Femke Crouwel Kiki Fockens Session A3: Chaired by Sebastian He Sebastian Hendrix Roni F. Kunst Francesca Paola Giugliano Jayron Habibe Laura Tseng Martijn Jong	Classical presentation Classical presentation Classical elevator pitch Classical presentation Classical presentation Classical presentation Classical presentation Classical presentation Classical elevator pitch Classical elevator pitch Classical elevator pitch	Activated, cytotoxic CD27+PD1+ CD8 T cells in Refractory Celiac Disease type II Sympathetic innervation promotes cell proliferation in intestinal epithelial crypts through adrenergic receptor a2A activation Stool microbiome communities predict remission in treatment-naïve pediatric Crohn's disease patients Analyzing type 2 diabetes associations in the gut microbiome of South Asian Surinamese and African Surinamese living in the same geographic area Erythrocyte methotrexate polyglutamate concentrations in patients with Crohn's Disease: towards a new therapeutic drug monitoring tool Instant microbial identification using Al to improve long-term health Editing DNA methylation of SP140 gene using CRISPR deficient-Cas9 approach for studying differential DNA methylome profile in CD patients Microbial metabolism of thiopurines Linked color imaging improves identification of early gastric cancer for both expert and non-expert endoscopists ZOOM: Breakout Room 3 SPRING is a novel determinant in SREBP signalling and cholesterol metabolism A reduced bile salt pool size and increased renal excretion protect ASBT-deficient mice against liver damage upon bile duct ligation Potential role of interferon gamma in modulating human intestinal epithelial barrier maturation The protective role of FHL2-deficiency in glucose metabolism Timing of therapy and neurodevelopmental outcome in 18 families with PDE-ALDH7A1 Automated identification of non-informative frames in upper gastrointestinal tract endoscopy video's using a convolutional neural network

13:20	14:30	Session A4: Chaired by Jamie van Son & Job Saris		ZOOM: Breakout Room 4
A4	1	Charlotte C. van Ruiten	Classical presentation	The separate and combined effects of dapagliflozin and exenatide on appetite, body weight, and activation in central satiety and reward circuits in patients with 2 diabetes
A4	2	Job Saris	Classical presentation	Characterizing the peritoneal immune landscape in patients suffering peritoenal metastasized gastrointestinal cancer
A4	3	Tim Kortlever	Classical presentation	Diagnostic yield using a FIT-based risk model was not better than FIT only: a randomized controlled trial in the second round of the Dutch CRC screening programme
A4	4	Jamie van Son	Classical elevator pitch	The role of central dopaminergic signalling in insulin resistance
A4	5	Sjoerd Nagelkerke	Classical elevator pitch	Health-related quality of life of children on home parenteral nutrition
A4	6	Sanne van der Rijt	Classical elevator pitch	The causal role of lipid metabolism on lifespan and age-related kidney disease
A4	7	Anne-Marieke van Dijk	Classical elevator pitch	Metabolic associated fatty liver disease as assessed by the Fatty Liver Index among migrant and non-migrant Ghanaian populations
A4	8	Lidewij Boogers	Classical elevator pitch	Growth and growth reduction in transgirls
A4	9	Ivan C.N. Fung	Classical elevator pitch	scRNA-seq exploration in IBD patients
13:20	14:30	Session A5: Chaired by Shafaque Rahr	man & Rebecca McIntyre	ZOOM: Breakout Room 5
A5	1	Rebecca McIntyre	Classical presentation	Inhibition of the neuromuscular acetylcholine receptor with atracurium activates FOXO/DAF-16-induced longevity
A5	2	Suzanne van Wouw	Classical presentation	Global Lipidomic Profiling of LXR Activation Identifies SLPG as a Sterol-Inducible Lysoplasmalogenase in Macrophages
A5	3	Karlijn Nass	Classical presentation	New classification for adverse events in gastrointestinal endoscopy: the AGREE classification
A5	4	Fernando Cázarez-Márquez	Classical elevator pitch	Daily Rhythms in Reproductive and Metabolic Neurocircuits and the Time-Dependence of their Responses to Cold
A5	5	Felipe Correa da SIlva	Classical elevator pitch	The contribution of microglial dysfunction to the pathogenesis of Prader-Willi syndrome
A5	6	Marte Becker	Classical elevator pitch	Crohn's Disease fistula show skewed lymphoid/myeloid balance, altered myeloid cell profiles and high TNF-a expression
A5	7	Claire van Helsdingen	Classical elevator pitch	Consensus on the definition of colorectal anastomotic leakage: A modified Delphi study
A5	8	Naomi Wieser	Classical elevator pitch	The role of Aryl hydrocarbon receptor's endogenous idoles on the development of neonatal gut
A5	9	Kim J. Beek	Classical elevator pitch	Advanced Magnetic Resonance Imaging techniques to distinguish inflammatory and fibrotic strictures in patients with Crohn's Disease
14:30	14:45	Break		
14:45	16:00	Workshops		ZOOM
		Making (remote) working together we	ork	ZOOM: Breakout Room 1
		Business drawing ("huis van verbeeld	ing")	ZOOM: Breakout Room 2
		Scientific outreach and how to use it i	for public awareness	ZOOM: Breakout Room 3
		Grant Writing for PhDs – Kick start yo	ur academic career	ZOOM: Breakout Room 4
		Present with Humor		ZOOM: Breakout Room 5
16:00	17:00	Online Escape Room		

Fuller, Itua 44b 2024							
_	day June 4th 2021						
13:00	14:00	AGEM presentations plenary		ZOOM			
13:00	14:00	Session B: Chaired by Jamie van Son 8	& Sebastian Hendrix	ZOOM			
В	1	Frank Wolters	Classical presentation	Oxylipins in cholestatic pruritus			
В	2	Sanne Jolien van der Veen	Alternative presentation	Early start of enzyme replacement therapy in pediatric male patients with classical Fabry disease is associated with attenuated disease progression			
В	3	Frouwkje Politiek	Alternative presentation	Identification of novel therapeutic targets in Hyperimmunoglobulinemia D and periodic fever syndrome			
3	4	Gemma Pitotti	Classical elevator pitch	Over-exposure to LPS and Flagellin leaves preterm infants susceptible to sepsis			
3	5	Bibiche den Hollander	Alternative elevator pitch	NANS-CDG: delineation of the genetic, biochemical and clinical spectrum			
В	6	Shafaque Rahman	Alternative elevator pitch	miR-511 deficiency improves DSS colitis in mice			
3	7	Elsa van Liere	Alternative elevator pitch	The Scent of Lynch Syndrome			
3	8	Soumia Majait	Alternative elevator pitch	Targeting the secondary bile acid glycodeoxycholic acid as therapeutic strategy in type 2 diabetes mellitus			
В	9	Tim R. van Elst	Alternative elevator pitch	Timing is everything; could the moment of (not) eating make a metabolic difference in the obese?			
14:00	14:15	Break					
14:15	15:00	Invited Speaker: Prof. dr. Harry Sokol		ZOOM			
15:00	15:15	Break					
15:15	16:30	Workshops		ZOOM			
		Making (remote) working together we	ork	ZOOM: Breakout Room 1			
		Business drawing ("huis van verbeeld	ing")	ZOOM: Breakout Room 2			
		Scientific outreach and how to use it	for public awareness	ZOOM: Breakout Room 3			
		Present with Humor		ZOOM: Breakout Room 4			
		AGEM valorisation/PPP policy (for gro	oup leaders only)	ZOOM: Breakout Room 5
